Contents

1	Main.py	3
2	Config.py	4
2.1	Function: poll_config()	4
2.1.1	Purpose	4
2.1.2	Run-Time Requirements	4
2.2	Function: read_config()	4
2.3	Function: get_config()	4
2.4	Function: save_config()	4

Introduction

This is a loose set of documents meant to help whomever follows me to make sense of my python code.

It's divided into chapters based off of the Python files with the sections for each function with (hopefully) good links between them as needed.

This documentation is type-set in L^AT_EX to make for ease of linking for the original creator (Rob) but it may be unwieldy to whomever follows so use it as a template if needed.

Chapter 1

Main.py

Chapter 2

Config.py

2.1 Function: poll_config()

2.1.1 Purpose

This function is meant to ask if the user wants to use a pre-made configuration file.

- Inputs: None
- Outputs:

2.1.2 Run-Time Requirements

We used the following:

- *ConfigParser* [1]
- *EasyGUI* [2]

2.2 Function: read_config()

2.3 Function: get_config()

2.4 Function: save_config()

Bibliography

- [1] *ConfigParser*. (ver:7.1.0). URL: <https://pypi.org/project/configparser/>.
- [2] *EasyGUI*. (ver:0.98.2-RELEASED). URL: <https://pypi.org/project/easygui/>.
